

Unit

Planning

Identify desired results

Assessment

How will we know when students have learned the material? What evidence is sufficient?

Considerations

Teachers should take any test they plan on proctoring at the end of a unit prior to planning the unit.

Determine what students need to know

Instructional Focus

What standards are the primary focus for this unit?
Which prior standards support these standards?

Scaffolding

Are the students missing any background knowledge? Are their barriers to their understanding that need to be addressed?

Plan learning experiences and instruction

Instructional Strategies

What instructional strategies will be used to provide content? How will students be grouped? What formative data can be collected?

Enrichment & Remediation

How will the needs of students who grasp the concept quickly be addressed? What supports will be in place for students who struggle?
